

Our Learning Journey: The World has Changed

Year 2: Animals including humans.

- 1** **Do animals and their offspring look similar?**
Animals and their offspring often have the same body parts, such as a kitten and a cat. A caterpillar looks very different to an adult butterfly.
- 2** **What is the life cycle of an animal?**
A caterpillar hatches from an egg. It changes into a pupa and then a butterfly emerges from it.
- 3** **What is the lifecycle of a human?**
Here is the life cycle of a human: baby, toddler, child, teenager, adult and elderly.
- 4** **What are the basic needs of animals?**
The basic needs of animals including humans are water, food and air. They need these things to survive.
- 5** **What are the different food types?**
The main food types are carbohydrates, protein, dairy, fats and fruit and vegetables.
- 6** **How can we stay healthy?**
We can stay healthy by washing our hands, eating the right amount of foods and by exercising.
- 7** **Why is hygiene important?**
We need to brush our teeth and wash our hands to stay healthy.
- 8** **What happens when we exercise?**
We feel good, our heart races and we sweat when we exercise.
- 9** **What have I learnt about Animals including humans?**
I can use pictures, labels and captions to share what I have learnt.
